SPECIAL NOTES FROM EDITOR (by Tedd/KB8NW)

My BARF80 Linux system is still in "LIMBO", so I continue to retrieve my E-mail and send the bulletin out via my ISP (hamnet.org) direct (until a new Linux system can be found or put together). Hopefully, things will get back to normal soon.

Lastly, OPDX's Chief Proof-Reader, Linda my wife, had her surgery on Monday to have her gall bladder removed and I am pleased to say she had no complications during her procedure. She is, however, sore and recovering at home. Thanks to the individuals who sent her get well messages.

DXCC NEWS (DXCC Rule Removal)

Bill Moore, NC1L, ARRL Awards Branch Manager, reports (on August 18th) the following from the July 2008 ARRL Board of Directors Meeting: "The Board also acted on the Programs and Services Committee report, voting to eliminate Rule 5 from Section III of the DXCC Rules. The Committee realized that while publishing log data can have a detrimental effect on operating awards, it was not possible to control such actions and the rule cannot be enforced. As part of an effort to maintain the integrity of operating awards programs, the Board called on staff to create resources and guidelines for QSLing and for QSL managers. These guidelines will help people who QSL to understand the 'best practices' and help to support the work of the QSL manager so that access to log data won't degrade Amateur Radio's long tradition of the 'honor system'."

The rule reads:

> **5. The presentation in any public forum of logs or other representations of station operation showing details of station activity or other information from which all essential QSO elements (time, date, band, mode and callsign) for individual contacts can be derived creates a question as to the integrity of the claimed QSOs with that station during the period encompassed by the log. Presentation of such information in any public forum by the station operator, operators or associated parties is not allowed and may be considered sufficient reason to deny ARRL award credit for contacts with any station for which such presentations have been made. Persistent violation of this provision may result in disqualification from the DXCC program.**

"This rule cannot be enforced. In its place staff will create resources and guidelines for QSLing and for QSL managers in order to maintain the integrity of operating awards programs."

QSL INFO AND NEWS

John, **9M6XRO** (ISWL 9M6-6982), reports: "My QSL Manager Tim, M3SDE, has successfully upgraded his license and his new call is M0URX. Some QSL Manager lists have already been amended and this appears to be causing some confusion among DX-ers who have started asking if my QSL route is via M3SDE or via M0URX. If they make a quick check on **(QRZ.com)** they will see that M3SDE and M0URX are one and the same person with the same

mailing address. This morning I changed all my calls on **(QRZ.com)** to show "QSL via M0URX". Tim has also retained the call M3SDE and has made arrangements with the RSGB QSL Bureau to receive all cards which arrive for M3SDE. I want to re-assure everyone who has sent a card via M3SDE that these QSL cards will still reach Tim and he will reply to all incoming cards as usual. M0URX is now listed as QSL Manager for my calls, as follows: 3DA0OK, 9M6/G3OOK, 9M6XRO, 9M6XRO/P, A25OOK, C91XO, G3OOK, GM3OOK, V8FRO, XU7XRO and ZS6/GM3OOK"

ZS8, MARION ISLANDS

There is still no activity reported. However, Rhynhardt, ZS6DXB, ZS8T Press Officer, reported the following this past week (dated August 21st - edited): "In April, Petrus, ZS6GCM, arrived on Marion Island to begin a year of work. Sometime in May he erected the SteppIR vertical he took along and ran into a few difficulties. He did make one contact during the month but efforts to resolve these difficulties were unsuccessful and Petrus' work commitments impeded our efforts to communicate via other methods with Petrus.

It has been over two months since we have heard from Petrus and are as much in the dark as the DX Community as to his plans.

At this point we are at a loss why Petrus has not been able to find time to put ZS8T on the air, he certainly made the efforts to obtain permissions and training before leaving for the Island. We must assume his job as administrator to the scientific community was much more than he contemplated. Petrus is on Marion Island for 7 more months.

If and when Petrus surfaces we will inform the DX Community. We are as disappointed as you..... 73, Rhynhardt Louw, ZS6DXB"

For updates and the first offical announcement of ZS8T being on the air, please visit the official ZS8T Web site at:
